DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being fully anticipated by Tench et al. (6111685).

Re claim 1, Tench et al. teaches for example in fig. 1, a molecular system (112) configured between a pair of electrodes (106, 110), said molecular system including at least one organic non-polymeric molecule (col. 9, ln. 8) that changes color when oxidized or reduced by an electric current (abstract).

Allowable Subject Matter

Claims 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103

would be proper. The prior art fails to teach a combination of all the claimed features as presented in dependent claim 9.

Specifically regarding claim 9, Tench et al. (6111685) teaches the state of the art of a molecular system.

But, Tench et al. fails to explicitly teach a combination of all the claimed features including said organic non-polymeric molecule comprises a substituted tetrazole, as claimed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
